Type
A. Score fidelity with measurement-invariance support
B. Individuation without adequate calibration
C. Limited individuation with structural evidence
D. Score fidelity with structural discrepancy
E. Score fidelity with limited structural evidence
F. Unclassified residual
Structural evidence not established (baseline CFA misfit)
Structural model not estimable (nonconverged, not identified or inadmissible)
Structural status (marker)
Scalar
Configural fit (CFA)
Congruence (gated ESEM)
Discrepant (gated ESEM)
Baseline CFA misfit
Model not estimable
